

SUPPLIER QUALITY AUDIT REPORT

NovaCast Engineering Sp. z o.o., Gliwice, Poland

Audit Reference: SQA-2026-NCE-003

Audit Date: 2026-06-12 | Auditor: James Mitchell, SQE Lead

Buyer: Motor Housing Component Sourcing Project

EXECUTIVE SUMMARY

NovaCast Engineering was audited for qualification as a Preferred Supplier for Motor Housing Assembly (MHA-2026-Rev3).

Overall Audit Score: 94/100 – APPROVED for Preferred Supplier status.

SCOPE OF AUDIT

- Quality Management System (vs. ISO 9001:2015 / AS9100D)
- Production process: Gravity casting, CNC machining, surface treatment
- Supply chain controls and sub-tier supplier management
- Corrective action and non-conformance management

FINDINGS

Major Non-conformances: 0

Minor Non-conformances: 1

OBS-001: Calibration records for CMM #3 overdue by 14 days.

Corrective action: CMM #3 recalibrated 2026-06-18 (CLOSED)

Observations: 2 (process improvement opportunities)

KEY STRENGTHS

- Full PPAP Level 3 capability demonstrated
- Excellent first-article inspection process
- Robust statistical process control (Cpk > 1.67 on critical dims)
- AS9100D certified – extends into defense supply chains
- Engineering team fluent in English and German

CONCLUSION

NovaCast Engineering is approved for qualification as a Preferred Supplier.

Next scheduled audit: June 2027.

Signed: James Mitchell, SQE Lead – Motor Housing Sourcing Project

APPENDIX A – SUPPLIER QUALIFICATION AND APPROVAL PROCESS

A1. NEW SUPPLIER QUALIFICATION

- Step 1: Supplier Self-Assessment Questionnaire (SAQ) – returned within 10 days
- Step 2: Quality Management System documentation review
- Step 3: On-site audit (for orders > USD 50,000/year or safety-critical parts)
- Step 4: First Article Inspection (FAI) per AS9102 or equivalent
- Step 5: Production Part Approval Process (PPAP) Level 3 minimum
- Step 6: Approved Supplier List (ASL) entry – valid 3 years with annual review

A2. FIRST ARTICLE INSPECTION REQUIREMENTS

- Balloon drawing with all dimensions inspected and recorded
- Material test certificate with heat number traceability
- Surface finish measurement report (Ra on all critical surfaces)
- Functional test report where applicable
- Dimensional report: CMM or conventional measurement, all GD&T callouts

A3. ONGOING SUPPLIER PERFORMANCE METRICS

- On-Time Delivery (OTD): Target $\geq 95\%$ | Minimum acceptable: 90%
- Incoming Quality Rate (IQR): Target $\leq 2\%$ defect | Disqualify: $> 10\%$
- Corrective Action Response: ≤ 10 business days for 8D response
- Customer Satisfaction Score: Tracked quarterly via Supplier Scorecard
- Annual Business Review: Mandatory for all suppliers > USD 100K/year

A4. DISQUALIFICATION TRIGGERS

- Lapse of mandatory certification (ISO 9001:2015 or equivalent)
- Three consecutive OTD failures below 90%
- Single-lot defect rate exceeding 10% incoming AQL
- Failure to respond to Corrective Action Request within 30 days
- Fraudulent documentation, sub-tier substitution without approval
- Country risk rating below threshold per procurement policy PR-2026-04

A5. APPROVED TESTING LABORATORIES

- For RoHS/REACH: Bureau Veritas, Intertek, SGS, TUV SUD, Eurofins
- For dimensional: Any ISO/IEC 17025 accredited CMM facility
- For material: Mill certificate + independent 3rd party for critical alloys

A6. PACKAGING AND LABELING REQUIREMENTS

- Individual part protection: Bubble wrap or foam tray, no bare metal contact
- Inner carton: Max 20 units, moisture-desiccant included
- Outer carton: Double-wall corrugated, gross weight max 20 kg
- Label (minimum): Part number, revision, quantity, date code, supplier ID, PO#
- Country of origin marking: Per importing country requirements
- Special handling: Fragile, this side up, humidity-sensitive as applicable
